-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichikawa et al.

Regarding claims 1, 2, and 4, Ichikawa et al patent teaches an image display device comprising a main body (5) that can be worn on the head of a user; and display means (11-14) for displaying a predetermined image (column 8, lines 25-36), said display means being provided on the main body in such a manner that it is not very clearly visible for said user when said user wearing said main body on his or her head looks straight ahead (line connecting the ear to the eye of the user in Fig. 1), and that it becomes clearly visible for said user when said user moves his or her eye down at an angle equal to or larger than 20 degrees (see illustration in Fig. 1 with the connecting line defined above included); said image display device offers good visibility for said

Art Unit: 2873

user when said user wearing said main body on his or her head looks straight ahead (the display device is not on the connecting line defined above).

Regarding claim 3, the **approximate value** of angle of 45 degrees recited can be seen from the illustration in Fig. 1 with the connecting line defined above included.

Regarding claims 6-9, reference should be made to Fig. 34 and the accompanying texts, in which the right-eye display means can comprise elements 731-734, 737 and A_R ; and the left-eye display means can comprise elements 731-733, 735, 736, 738 and A_L . The remaining characteristics are similar to the ones pointed out above. Therefore, detailed explanation thereof is omitted here.

Allowable Subject Matter

Claims 5 and 10-13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
